

Bias Tape Maker Set

This set includes Bias Tape Folder/Makers for 1", 1 1/2", and 2" wide strips of bias fabric. To prepare the folders, print out on CARDSTOCK (110 weight) paper. Cut out folders and slider pieces. Fold on vertical lines of each piece so decorative sides appear as shown in diagram. Fold and tape back the sides of Sliders. It is optional to thread a thin ribbon or crochet thread through holes indicated by dots to use as a pull assist while ironing fabric.

To use:

1. Open up folder so it's laying flat, but folds will turn upwards when ready to use.
2. Lay end of fabric in center of folder so about 1/4" sticks out from end.
3. Turn over folder sides from outside edges twice on each side, so fabric edges are flipped into folds.
4. Slip end of folder (with a bit of fabric sticking out) through Slider.
5. Make sure inside folder edges are slightly "standing on edge" so you can see the colored edges at the wider end of folder as shown in pink in the diagram.
6. Make sure fabric is straight as it's going into the folder and gently pull out from narrow end.
7. Iron the folded end and keep iron close to folder as you slowly slide the folder along strip by slider or pull thread.
